

One-eyed Ball Toss

How important are two eyes for depth perception? Test it with this ball toss.

Toss the ball in the air 5 times, so the ball goes high above your head, and catch it. Write down how many times you successfully caught the ball.

Now, cover one eye with the bandana and try it again. Write down how many times you successfully caught the ball.

Cover the other eye with the bandana and try it. Write down how many times you successfully caught the ball.

Was there a difference with two eyes compared to one eye?

Person 1

Two eyes

Left eye

Right eye

Person 2

Two eyes

Left eye

Right eye
