

## Sebastien Haneuse

Sebastien Haneuse is Professor of Biostatistics at the Harvard T.H. Chan School of Public Health. He received his PhD from the University of Washington in 2004. After spending a year at Vanderbilt University, he returned to Seattle and worked at the Group Health Research Institute for five years, moving to Boston in 2010. His statistical/methods research focuses on a range of issues that arise in observational population-based research, including study design, missing data and competing risks. His collaborative research has spanned a wide range of clinical and public health contexts, including: breast cancer screening, Alzheimer's disease, bariatric surgery, hospital profiling, LGBTQ health, pediatric obesity and the role of fathers in early childhood development.
